

UNESCO Associated school project

As an Associated school project Lindbjergskolen is a part of UNESCOs ASP. We are a part of an international network for schools, that work with focus on Global Citizenship and the Sustainable Development Goals.

At Lindbjergskolen we want our students to become responsible World Citizens. That is why we incorporate the world around us in our teaching and teach the pupils to realize, that they actually can be a part of making a difference worldwide.

The first thing you spot while entering Lindbjergskolen at the main entrance is a major floor foil with the Sustainable Development Goal logo. By doing so we want to show the world around us we regard ourselves as a part of the globalized world.

The work with the Sustainable Development Goals is a natural part of everyday life at our school. Pupils in the 8th and the 9th grades are educated as World undersized ambassadors, who among other things are to have focus on the Sustainable Development Goals and teaching younger pupils in them. Annually we organize a Sustainable Development Goal day, where parents of the school and local citizens participate. Besides focusing on the Sustainable Development Goals we will inform the local society about how we together can contribute to fulfil the goals.

At Lindbjergskolen our aim is to create partnerships with Danish as well as foreign ASPs due to exchanging ideas and experiences along with the work with the Sustainable Development Goals and creating contact with pupils across cultures and countries.
